

“ Our management firm has several Associations using your service with great success. The power of credit reporting is most effective. We highly recommend RecoverHoaDues.com. ”

Geri Bond, VP · Florida Property Mgt Co.

Board Members across the nation are now using a time-honored financial motivation – credit reporting – to motivate homeowners who are delinquent on assessments. This simple \$25 option works best after late notices stop working, and before you pursue legal action.

Homeowners are *always* instructed to pay your Association (or your agent) directly – we never touch your Association’s money.

Our national HOA collections success rate is 52.4%. We work with law firms, management companies, POA, HOA, and COA boards of all sizes throughout the nation.

Collections work is done in complete compliance with all FDCPA, FCRA, and CFPB regulations, as well as all state and federal statutes and laws. We provide a sound layer of protection for your community and board as we are the responsible agent for all regulatory compliance.

Additionally, we provide your community’s board with a level of clarity and reporting unheard of in the industry. Online progress reports show you how much money has been collected, what letters have been sent, when phone calls are made, and even our internal notes from phone conversations with your homeowners – all in real time.

You only pay a one-time flat fee of \$25 (or less) per delinquent account submitted, with no other fees.

◦ **ACCESS TO CRYSTAL CLEAR PROGRESS REPORTING**

Our online system documents everything for your Board’s review and supervision: from your homeowner’s actions, to our internal efforts, to your management firm’s compliance – all in real time.

◦ **CLEAR COMMUNICATION WITH YOUR HOMEOWNERS**

We utilize skip tracing, a phone and letter campaign, and an attorney written demand to communicate to homeowners the importance of making payments directly to your HOA (or its management firm), in order to avoid being credit reported to Experian, Equifax, and TransUnion.

The consequence of credit reporting successfully motivates homeowners – without burying them in legal fees.
